

PB-M-223

IMAGERY ANALYSIS SERVICE

PRODUCTION BOARD MEETING

Thursday, 6 December 1973 - 0930

MEMBERS PRESENT

OBSERVERS

[Redacted]

25X1A

IAS NOTES

Two Notes were reviewed and approved for publication.

INSTALLATION DATA FILE (IDF) CODES

25X1A [Redacted] commented on the requirement to change our component codes
25X1A in the IDF due to IAS' reorganization. The ADP team is working with
25X1D [Redacted] in developing a conversion plan. (Subsequently,
conversion of the codes was set for the week of 10 December so that
[Redacted] will be based on our new MIS codes.)

WIDE-FIELD HIGH-POWER ANAMORPHIC STEREOVIEWER

25X1A [Redacted] indicated that this prototype device designed for detailed
imagery analysis, is in IAS for operational evaluation. It features very
high quality optics, with image rotation, a magnification range of 10x to
180x, a wide field of view, anamorphic correction, and 6 inch stages
incorporating translation and rotation features. Production cost is
estimated at about \$75 K per unit in quantities of 10.

EQUIPMENT

25X1A [Redacted] indicated that there are still loose pieces of equipment
in the hall which we need to find a place for. In particular, are the
1540's. Lack of 220 outlets for the 1540's will pose no problem, as
[Redacted] can rewire the instrument plugs for use on the conventional
120v outlets.

LIGHT TABLE PURCHASES

Purchase of the 26 light tables is still pending approval from the
DDI Planning Staff.

MANAGEMENT INFORMATION SYSTEM

25X1A

[] announced that the new computer codes for time sheets will be put into effect next week. These codes will assure a more accurate and timely account of information, which is critical because of Management by Objectives.

SUBJECT CATEGORY CODE DESCRIPTIONS

25X1A

[] explained the introduction of suffixes and additional project numbers. These will enable IAS to account more accurately for preliminary assessment and assimilation of KH Missions.

25X1A

[] stated that the MIS cannot presently provide information on individual people. To satisfy this the PI will use the three numbers of his IAS badge instead of activity code (016). Hopefully, this will be implemented by 1 January 1974.

UNIDENTIFIED TARGETS GROUP

25X1A
25X1A

[] suggested that this group be abolished as it is not the problem it was three or four years ago. He would like to have a single coordinator to handle unidentified with the division. [] was suggested and subsequently approved by the director as coordinator.

25X1A

REASSIGNMENTS TO SPECIAL TEAMS/COMMITTEES

Reassignments to special teams and committees and some restructuring was accomplished and approved by the Director. The revised listing is attached.
